

User story 4:

1. Given that I am on the main screen
2. And I am a patient and the app has previously authenticated me
3. I can view graphs of wear time data collected by the end device

User story 5:

1. Given that I am a parent who has been registered as a parent of a patient
2. I can open the app and find myself on the main screen where I can see the same information that my child would see

User Story 6:

1. Given that I am in the main screen of the app
2. and I press the 'Contact us' button
3. I should be greeted with a small text prompt
4. I enter my question/concern into the text prompt and hit send
5. an acknowledgement should be made and my message should be available as a note on the clinician's interface

User Story 7:

1. Given that I am a patient registered with a device and I have not worn the device in a few days
2. the device should display a notification on my home screen that I have not worn the brace for quite a while

User Story 8:

1. Given that I am registered to the device and the sensor is constantly transmitting reports to my phone
2. My phone should be able to store daily reports basically indefinitely and upload unuploaded reports when it has access to the internet again
3. I should have an option to disable its access to my data usage

User Story 9:

1. Given that I am on the main screen of the app
2. And I press the button that says 'contact us'
3. a text box will appear to prompt me

4. I enter my query into the box and the message should be sent to my clinician
